Aims and Scope:

"**Categories and General Algebraic Structures with Applications**" is an international journal published by Shahid Beheshti University, Tehran, Iran, **free of page charges**. It publishes original high quality research papers and invited research and survey articles mainly in two subjects: **Categories** (algebraic, topological, and applications in mathematics and computer sciences) and **General Algebraic Structures** (not necessarily classical algebraic structures, but universal algebras such as algebras in categories, semigroups, their actions, automata, ordered algebraic structures, lattices (of any kind), quasigroups, hyper universal algebras, and their applications).

Submission:

Your Manuscripts should be written in good English using the style of the journal given in the web page: *http://www.cgasa.ir*. Submissions should be made online in the web site or by emailing the PDF file of your manuscripts to the *Editor-in-Chief* at: *m-ebrahimi@sbu.ac.ir*. Articles under consideration for the journal should be neither published nor submitted for publication elsewhere.

Refereeing process:

After the Editorial Board approves that a submitted paper meets the aims and scope of the journal, it will be sent to one or two experts, advised by the Editorial Board or by a member of the Honorary Associate Editors, to review it. The refereeing should be completed in three months, unless the paper is longer than 15 pages. Based on the referee's report, the Editorial Board decides on the paper as:
The paper is accepted without changes; The paper is accepted subject to minor changes, in which case the revised version should be sent back to the journal in at most one month; The paper will be accepted subject to more substantial changes being made, in which case the revised version should be sent back to the journal in at most two months; The paper might be acceptable but requires major revisions, in which case the paper will be regarded as withdrawn and any new version will be regarded as a new submission; The paper is rejected.

Accepted articles:

If a paper is accepted, the corresponding author will be required to provide the LaTeX file of it that has been prepared using, **without changes**, the style of the journal. Please ensure the **Bibliography** is produced in the same style as the sample article. Accepted papers should also have a **Persian** abstract, which can be prepared with the help of the editorial board at *m-mahmoudi@sbu.ac.ir*

Journal Address:

Categories and General Algebraic Structures with Applications, Department of Mathematics, Faculty of Mathematical Sciences, Shahid Beheshti University, Evin 19839, Tehran, Iran. Telefax: 0098 21 22431652, Web page: *http://www.CGASA.ir*

Publisher: Shahid Beheshti University.
Reprints: Each author will receive 5 reprints free of charge.
Subscription: Please contact the Editorial Office in the web site for subscription information.

Contents

Bernhard Banaschewski

Countable composition closedness and integer-valued continuous functions in pointfree topology **1**

Themba Dube

Concerning the frame of minimal prime ideals of pointfree function rings **11**

Themba Dube and Inderasan Naidoo

A pointfree version of remainder preservation **27**

Victoria Gould and Rida-e-Zenab

Semigroups with inverse skeletons and Zappa-Szép products **59**

Wei He

A note on semi-regular locales **91**

X. Zhang, W. Zhang, U. Knauer

A characterization of a pomonoid S all of its cyclic S-posets are regular injective **103**
